

A dark, high-contrast, black and white photograph of a dense crowd of people, possibly at a concert or event. The image is mostly black with some faint, lighter areas suggesting the presence of many people. Overlaid on the image is the name 'Louise McKenna' in a large, bold, white, sans-serif font, oriented vertically from top to bottom.

# Louise McKenna

**Gary Washington**

Mr Washington,

It has come to my attention that your name is being used to harbour viruses that are being transmitted through the electronic mail network.

I thought it was equally important to advise you of this deception as it is to inquire why you believe your name might be used as a host for such a purpose.

Please excuse my intrusion but I hope you understand my interest as much as I look forward to your reply.

With respect and sincerity,

Pat Macan

Thanks for informing me of this (but to be honest I wasn't going to respond to your email since at first I thought you were a spammer looking for my address since this is the first I've heard of you) as is the first I've heard of this. I thought mac users (which I am one) were immune to this things. Still anyway I could detect and rid myself of this would be appreciated. And I appologies if I am the one that's causing this.

thanks for the info/warning.

GTW
